Full job description

Your new company

An innovative, established Engineering Consultancy have withstood the turbulence of the construction industry. Their core values and their success have been built on trust, integrity and exceptional customer service.

Your new role

You will join a team of 50+, reporting to the Senior Hydraulics Design Engineer. It is a highly involved position which requires strong management skills to lead and hold responsibility for managing a variety of Hydraulic designs. You will have the opportunity to work on projects with a value up to \$17 Million AUD.

What you'll need to succeed

To be considered for this role you must be able to fulfil following:

- Degree level qualifications in Mechanical or Electrical Engineering
- A minimum of 3 years' experience designing Hydraulic Systems in the consultancy space.
- Exposure to major commercial projects.
- You must be proficient using AutoCAD & Revit

What you'll get in return

They offer a family feel working environment; an open-door policy from the Directors which is often lacking in larger organisations. You will be well supported and have a lot of opportunity to broaden your experience and grow as a Hydraulics Design Engineer.

What you need to do now

If you are interested in this role, click 'apply now' to forward an up-to-date copy of your CV or call Chris now on 02 8226 9723.
