

## Axiom Developer

Hays • Sydney CBD NSW

Base pay

\$120,000 - \$130,000

Work type

Full time

Contract type

Permanent

### Full job description

Your new organisation:

We are currently partnering with a leading consultancy to source for numerous data roles that will be working onsite at a "big 4" bank on some exciting projects

Role Description:

- You will work as a passionate Axiom Developer focusing on the development and maintenance of our regulatory reporting systems
- Work with the Technical Delivery Lead and Solutions Architect to ensure deliverables conform to architectural, technical, security and data access standards
- Unit testing components to ensure deliverables meet acceptable quality metrics
- Pro-actively identify and manage data risk, ensuring risks are understood by related parties and developing risk mitigants
- Full development life cycle; from development through to deployment of deliverables to Production environments

Required Experience and Skills:

- The Axiom Developer would need to have at least 6+ years of development experience using AxiomSL. This Candidate must be a strong Axiom Developer to work in regulatory reporting and risks projects.
- V10 experience will be plus.
- Good knowledge of individual objects of Axiom (Aggregation, Data Models, Portfolios, Stream and Instance Keys etc.) including their various configurations and settings
- You'll be someone that defines a clear success criterion with a focus on customer service and stakeholder engagement
