Full job description

Your new company

Hays Engineering has partnered up with a reputable boutique consultancy which specialises within the Mechanical and Energy industry. They are going through a substantial growth period as they have an extremely strong pipeline with future work already secured. Therefore, they are looking for an experienced Mechanical Engineer to join their dynamic team in their CBD Office.

Your new role

As a Mechanical Engineer you will be engaging with the design and construct element of the project which means you will gain exposure to both design and delivery. You will be reporting to the Directors and working alongside with them on premium commercial buildings and shopping centres predominately doing mechanical fit outs.

What you'll need to succeed

The successful candidate will come from a Mechanical Engineering background with at least 3 years of local experience within a Contractor or a

Consultancy. The minimum expectation is that you can run a minor job with full autonomy. You must be passionate about sustainability, accountable and ambitious. The ideal candidate will have strong experience with AutoCAD and Revit and must have good communication skills.

What you'll get in return

This is a permanent opportunity where the company has a continuing healthy pipeline of work as well as a strong pathway into more senior/associate roles. They provide a beautiful office with creative breakout areas makes for a collaborative team environment. Additionally, there is flexible working hours and days will give you a work life balance suited to your lifestyle.

What you need to do now
