Full job description

Your new company

Based in the North Shore Sydney, this organisation is looking to take on a Mechanical Engineer to work on several projects in the water treatment space. The company has developed a successful business over the 20+ years and is organically growing due to a forever increasing workload.

Your new role

As a Mechanical Design Engineer, you will work closely with the Project Delivery team and will be responsible for providing designs to comply with project specifications and compliance.

What you'll need to succeed

- You must have a minimum of 5 years' experience working on Water Treatment systems for commercial and residential pools.

- Bachelor of Mechanical Mechatronics Engineering is important
- Proficiency using BIM and Revit is essential
- You must have exposure to working on water treatment plant and site measure layouts.

What you'll get in return

This is a permanent role where the company has a continuing healthy pipeline of work. This organisation values loyalty and you will be well rewarded for your efforts with a flexible work-life balance and competitive salary. Training is conducted internally giving you the opportunity to learn new skills and software as well as the opportunity to attend external training.

What you need to do now

If you're interested in this role, click 'apply now' to forward an up-to-date copy of your CV, or call Chris now on 02 8226 9723
